

“...The Enterprise Solution to Compliance and Risk Management”

The effective management of compliance and risk is critical to the survival and success of public and private-sector organisations alike. Qudos System 3 offers the enterprise solution you have been waiting for

Application

Qudos System 3 is suitable to help you meet requirements such as:

- ISO 9001 Quality
- OHSAS 18001/AS/NZS 4801 Occupational Health & Safety
- ISO 14001 Environment
- ISO 22000 / HACCP Food Safety
- Freedom of Information
- ISO 17799 Information Security
- Industry accreditation

A high level of user configuration enables it to be used in just about any operational compliance and risk context.

Suitable for any industry with existing users in sectors such as: health care, education, manufacturing, transport, finance, information technology, and construction.

Its web-server design enables it to be used on single sites, multiple sites, and for remote access – using just a standard browser and suitable connection.

Functionality

Qudos System 3 has a well-proven, modular design to help you effectively and efficiently perform the key tasks necessary for all compliance management systems:

- Objective planning
- Document management
- Issues management
- Corrective / Preventive action
- Internal Audits
- Meetings/Management review
- Training/Employee development
- Risk Assessment
- Performance measurement

Technology

The user-interface to Qudos System 3 is via web browser – linked by advanced .net technology to a powerful MS SQL server database. With hosted or self-hosted options, Qudos System 3 offers a web-enabled 21st century solution utilizing the Internet or your intranet.

There are some good document management products on the market, some good risk management software, and even a few products that combine audits/actions and one or two other functions. But only Qudos System 3 offers such an absolutely unrivalled combination – helping you integrate your compliance activities, your management systems and your sites!

Key advantages:

Robust, industry-leading MS SQL Server database

Offering more secure, reliable storage for your data with the best options for analysis, reporting, and notification – helping you access important information and distribute it where needed in your organisation. This trusted platform will help you turn data into actions and better decisions.

User interface by web browser – using advanced .net technology

A clean modern look in a familiar browser environment. No installation necessary on client computers – this means less administration for IT personnel, and faster startup for new users. The new Qudos System 3 uses leading edge Microsoft .net technology – fast becoming the industry standard for enterprise software

Extensive functionality

A virtual one-stop shop for compliance and risk management. No comparable package offers this wide range of integrated functionality. Qudos System 3 enables you to bring so many critical activities under one umbrella, filter the database in millions of user-definable combinations, generate custom reports, and export or share your data.

Comprehensive training material and documentation

In-built HTML help and Flash training presentations, plus the Safety Manager and Quality Manager toolkits – packed with planning tools and training material on relevant standards, and hundreds of sample policies, procedures, forms, letters and other documents – ready for easy customizing in your standard word processor
